

NOTES Team Development Criteria

Must have a multidisciplinary team, such that the team possesses both advanced therapeutic endoscopic skills and advanced laparoscopic skills.

Should be SAGES and/or ASGE members.

Must have animal laboratory facilities to perform research and training.

Must agree to share lab results with other NOSCAR members at semi-annual group meetings.

Must agree that any and all human procedures be performed only after obtaining Institutional Review Board approval (IRB).

Must submit all cases to an outcomes registry that will be maintained by the sponsoring societies.
